

THAMIZHARASAN R

IOS DEVELOPER | REACT NATIVE DEVELOPER (3+ YEARS EXPERIENCE)

+91 8056711714 | thamizharasan.iosdev@gmail.com | Chennai | [Linkedin profile](#) | [Portfolio](#)

PROFILE

Mobile Application Developer with 3+ years of experience in native iOS development using Swift, UIKit, SwiftUI, and Objective-C. Experienced in developing, maintaining, and deploying production mobile applications, integrating REST APIs, push notifications, location services, offline functionality, and third-party libraries. Experienced in managing 300+ white-label applications using multi-target architecture. Delivered a React Native application end-to-end — from UI and navigation to backend integration, authentication, and native build/release for iOS and Android — building on a strong foundation in mobile UI, API integration, debugging, performance optimization, and app store deployment.

SKILLS

Languages: Swift, Objective-C

React Native: React Native, JavaScript/TypeScript, React, React Navigation, Android/iOS native build & release (Gradle, Xcode), Context API (state management), REST API integration

iOS Technologies: UIKit, SwiftUI, Core Animation, Core Data, Core Location, WidgetKit, ARKit, Concurrency, Debugging, Testing

Architecture: MVC, MVVM, Multi-Target Architecture

Networking & Services: RESTful APIs, JSON, Push Notifications (APNs), Location Services

Development Tools: Xcode, Git, GitHub, CocoaPods, Swift Package Manager

Platforms: iOS Development, macOS Development

WORK EXPERIENCE

Rifluxys Software Pvt, Ltd - iOS Developer

Jan 2023 - Aug 2026

- Develop and maintain native iOS applications using **Swift, UIKit, SwiftUI, and Objective-C**.
- Manage and deploy **300+ white-label iOS applications** using multi-target architecture.
- Develop reusable components and scalable features across multiple applications.
- Integrate **REST APIs, push notifications, Location Services, widgets, and third-party libraries**.
- Troubleshoot and resolve client-reported issues to improve application stability and user experience.
- Optimize application performance and stability across multiple iOS versions.
- Implement UI designs and enhancements using **UIKit and SwiftUI**.
- Manage **App Store submission and deployment** processes while following Apple's platform guidelines.
- Collaborate with developers, QA, design, backend, and other cross-functional teams to deliver application features and releases.

KEY PROJECTS

PalmAgent ONE

[Appstore Link](#)

Technologies: Swift, UIKit, SwiftUI, REST APIs, APNs, Multi-Target Architect, React Native, React Navigation

- Managed and deployed **300+ white-label iOS applications** using multi-target architecture.
- Built cross-platform mobile application using React Native and JavaScript.
- Developed and maintained scalable iOS features with a focus on **reusability, performance, and stability**.
- Integrated third-party libraries to extend application functionality and simplify development.
- Integrated **SwiftUI** components into an existing iOS project to **enhance** and **modernize** the user interface.
- Optimized application performance and stability across multiple iOS versions.
- Collaborated with cross-functional teams to ensure smooth feature implementation and application releases.
- Developed a **macOS app** using **WebKit** to render web content in a native container.
- Built a custom **macOS automation** tool using **Ruby** and **Fastlane** to archive iOS apps, generate **DMG files**, and upload them to **AWS for distribution**.

PalmAgent Dashboard

[Appstore Link](#)

Technologies: Swift, UIKit, SwiftUI, REST APIs, APNs, Location Services, Multi-Target Architect

- Developed a dashboard application to display **PalmAgent user analytics and usage insights**.
- Implemented **widget UI and functionality** to provide users with relevant application information.
- Implemented **AI-powered analytics** to collect, process, and present user activity data.
- Collaborated with cross-functional teams to ensure accurate reporting and smooth feature integration.

Social Flight

[Appstore Link](#)

Technologies: Objective-C, UIKit, Location Services, Map Integration

- Developed and maintained an aviation-based iOS application for pilots and aviation enthusiasts to discover **aviation events, airports, and nearby destinations**.
- Implemented **location-based features** to display aviation events, airport restaurants, museums, and attractions on an interactive map.
- Contributed to user engagement features including **event participation, rewards, and challenge systems**.
- Optimized application performance and user experience while handling large datasets of aviation events and destinations.

Swirl App

[Appstore Link](#)

Technologies: Objective-C, UIKit, Location Services

- Implemented features for **networking, event planning, content sharing, and marketplace interactions**.
- Contributed to collaboration features enabling users to interact with **teams, groups, and local communities**.
- Implemented **location-driven discovery** to help users connect with nearby communities, organizations, and businesses.

FoodTrack - Freelance

Technologies: React Native, JavaScript/TypeScript, React, React Navigation, Android/iOS native build & release (Gradle, Xcode), Context API (state management), REST API integration

- Built a cross-platform **React Native** (TypeScript) mobile application end-to-end for a freelance client, covering both **admin** and **end-user** experiences.
- Implemented **user authentication** and **session management**, with role-based navigation separating admin and user flows.
- Integrated a **REST API** backend (**Google Apps Script + Google Sheets**) as the application's data layer, including read/write operations, upsert logic, and per-user data scoping.
- Configured and produced signed native release builds for **iOS** and **Android**, including custom app icon assets and **Android SDK/Gradle** build setup.

PROFESSIONAL CONTRIBUTIONS

Client Issue Resolution

- Investigated, debugged, and resolved client-reported issues across multiple applications to improve application stability and user satisfaction.

App Submission & Deployment

- Managed end-to-end **App Store submission and deployment**, ensuring applications complied with Apple's platform guidelines and were released on schedule.

UI Design Implementation

- Translated UI/UX designs into functional iOS interfaces using **UIKit and SwiftUI**.
- Implemented UI enhancements across multiple applications to improve usability and user engagement.

EDUCATION

B.E. – Mechanical Engineering

Aug 2016 - Oct 2020

Kanchi Pallavan Engineering College, Kanchipuram
